IX. PROCEDURE FOR COVERAGE OF FARMERS & NODEL BANKS:-

1. Each individual bank branches for Commercial Banks / RRBs shall act as Nodal branch. Each DCCB will be Nodal Banks for PACs. The concerned Lead bank and Regional offices/ Administrative offices of commercial banks/ RRBs will provide necessary guidelines to concerned bank branches and coordinate with them to ensure that all concerned branches submit the consolidated proposals to insurance companies well within the stipulated cut-off dates and also upload the soft copy of insured details in crop insurance portal. Besides, insurance company may also use the IRDA approved insurance agents/ insurance intermediaries for the coverage of non-loanee farmers only.
2. Declaration/ proposal formats to be submitted by Nodal banks/ Branches shall contain details about Insurance Unit, sum insured per unit, premium per unit, total area insured of the farmers, number and category of farmers covered (small and marginal or other) and number of farmers under other categories (SC/ ST/ others) / Women along with their bank account details etc. (bank / their branches) **as per the format envisaged / provided in the crop insurance portal.**
Loanee farmers (Compulsory coverage)
3. Whenever banks sanction loan for a notified crop in a notified area, the crop loan amount only to the extent of **Scale of Finance for notified crops** and acreage of individual notified crops of loanee farmers shall be taken into consideration for compulsory coverage, as per seasonality discipline. Based on seasonality of Crops, banks should separately calculate the eligibility of loan amount for both Kharif and Rabi seasons based on the scale of Finance and declared acreage under notified crops. Disbursing bank branch/ Primary Agriculture Cooperative Society (PACS) will prepare monthly statement of crop-wise and insurance unit-wise details of crop insurance with premium as per the seasonality discipline. Loan disbursing bank branch/ PACS will finance the additional loan towards premium amount payable by farmer for crop insurance.
4. Crop loans through Kisan Credit Cards (KCC) are covered under compulsory coverage and banks shall maintain all back up records and registers relating to compliance with PMFBY and its seasonality discipline and cut-off-date for submitting Declarations in case of normal crop loans. Bank branch will apportion coverage among insurable crops, based on acreage mentioned in loan application or on the basis of actual area sown as declared by the farmer subsequently.
5. In case of PACS under its jurisdiction shall consolidate insurance proposals / statements from their bank branch / PACS under its jurisdiction, respectively and forward the same to insurance company along with details of remittance/ RTGS towards insurance premium, in accordance with cut off dates, as specified by SLCCCI for that particular crop and season.

Non-loanee farmers (Optional coverage) through Channel partners

6. Farmers desirous of availing insurance shall fill up Proposal Form of the Scheme and submit the same to nearest bank branch or authorized channel partner or insurance intermediaries of insurance company.
7. In case channel partner is a Bank, farmers will submit duly filled up proposal form in the village branch of a Commercial Bank (CB) or Regional Rural Bank (RRB), or PACS (DCCB) with requisite insurance premium amount. Operating a bank account is essential for such

cases. Branch/ PACS officials will assist the farmers in completing the insurance proposal form and provide necessary guidance. While accepting the proposal and premium, Branch/ PACS will be responsible for verification of eligible sum insured, applicable premium rate, etc. PACS will thereafter consolidate these particulars and send them directly/ to respective Nodal Banks respectively which will, in turn, submit crop-wise and insurance unit-wise Crop Insurance Declarations in the prescribed format, along with the premium, within the stipulated time, to insurance company. However the bank branches of commercial banks/ RRBs will directly submit the consolidated proposals along with details of insured farmers in the format envisaged in the crop insurance portal within the stipulated time.

8. Non-loanee cultivators could also be serviced directly by any designated agencies, other authorized channel partners or insurance intermediaries, approved by the IRDA for the purpose and they will act as a guide and facilitator wherein they will advise them the benefits and desirability of the Scheme and guide the farmers through procedures; collect requisite premium and remit individual/ consolidated premium to insurance company, accompanied by individual proposal forms and summary details in Declarations/ Listing sheet (MIS), provide soft copy to IA and details of each insured farmer and will also upload the data directly to the crop insurance portal.
9. While accepting the Proposal and the premium from aforesaid, designated agents, other authorized channel partner or insurance intermediaries, approved by the IRDA, it shall be the responsibility of Insurance Company or its designated agents to verify insurable interest and collect the land records, particulars of acreage, sum insured, crop sown etc., and applicable contract/ agreement details in case of share croppers / tenant farmers. The designated intermediaries shall remit the premium with consolidated proposals within 7 days. However, it is mandatory that the Non-loanee cultivators serviced by the designated intermediaries should hold a bank account in order to facilitate remittance of the claim, if payable.
Non-loanee Farmers (Optional coverage) - directly to Insurance companies
10. Non-Loanee farmer may submit insurance proposals personally / through post to insurance company with requisite premium. Non-loanee farmer can also avail insurance through 'on-line portal' of concerned insurance company or crop insurance portal designed by Government for the purpose. However, it is mandatory that Non-Loanee farmers, personally submitting proposals to insurance company or through crop insurance portal, should have insurable interest and submit necessary documentary evidence as proof as decided by SLCCCI (like print copy of application along with remittance of premium). The insured farmer forfeits the premium and the right to claim (if any) if the material facts furnished in the proposal form are wrong or incorrect.
11. Insurance companies retain the right to accept or reject insurance proposal(s) in case proposal is incomplete, not accompanied by necessary documentary proof or insurance premium ordinarily, within one month of receipt of proposal by Insurance Companies. If the proposal is rejected the insurance company will refund full collected premium.

Option for change of crop name

12. Farmers covered, on voluntary basis, can buy insurance before actual sowing/ planting, based on advance crop planning. However, for any reason if a farmer changes the crop planned earlier, he should intimate the change to insurance company, at least 30 days before cut-off-date for buying insurance or sowing, through financial institution/ channel partner/ insurance intermediary/ directly; as the case may be, along with difference in premium payable, if any, accompanied by sowing certificate issued by concerned village/ sub-district level official of the State. In case the premium paid was higher, insurance company will refund the excess premium.

Similarly, loanee farmers can also change the name of insured crop from the original crops submitted in the loan application but such changes should be submitted in writing to the concerned bank branch well in advance so that their proposed crops should be insured. However changes of non-notified crops to notified crops without submitting the sowing certificate is not permissible. Bank will ensure that all standard loans sanctioned for notified crops within stipulated cut-off date should compulsorily be covered.
13. Declarations/ proposals received from the Banks/ PACS after the cut-off date shall be summarily rejected and the liability, if any, for such declarations shall rest with the concerned bank. Therefore, the Banks / PACS must not receive any proposal after the cut-off date of coverage. The Banks/ PACS must also ensure that the consolidated statement along with the premium amount is remitted to the insurance company within the stipulated time, failing

- which they shall be responsible for payment of claims, if any to the farmers. However, any dispute in the matter may be referred to the Department by the concerned State/ Agency.
14. The concerned branches of banks and Nodal Banks/ DCCBs in case of PACS will also collect the list of individual insured farmers (both loanee and non-loanee) with requisite details like name, father's name, Bank Account number, village, categories – Small and Marginal/ SC/ ST/ Women, insured acreage, details of insured land, insured crop(s), sum insured, premium collected, Government subsidy etc. from concerned branch in soft copy also for further reconciliation and send the same to the concerned insurance company within 15 days after final cut-off date for submission of Proposal/ Declaration to insurance company and also upload the same on the crop insurance portal. Same standard format of crop insurance portal will be utilized.
 15. Insurance companies may also collect the requisite information in respect of non-loanee farmers from the channel partner in same formats. It is the responsibility of the concerned insurance companies to collect/obtain the details of the insured farmers (both loanee and non-loanee) from the bank/financial institutions/ intermediaries/ agents and facilitate the banks to upload the same on crop insurance portal.
 16. Insurance Companies should also verify and be satisfied themselves about the coverage of farmers/ crops and up-load the same in their websites within a month preferably before approaching the Government to release the final installment of subsidy under the scheme.

X. ASSESSMENT OF LOSS / SHORTEFALL IN YIELD

Wide Spread Calamities (based on season-end yield)

1. The Scheme operates on the basis of 'Area Approach' i.e., Defined Areas for each notified crop for widespread calamities and insurance unit is Village/ Village Panchayat or any other equivalent unit for major crops and for other crops it may be a unit of size higher than Village/ Village Panchayat level, to be decided by the State Government. State Government Department overseeing conduct of CCEs will submit yield data as per cut-off date decided by SLCCCI, along with results of individual CCEs. Yield data will be furnished to Insurance Company by State Government, in accordance with the cut-off dates fixed, and crops and areas notified, based on total number of CCEs being conducted.
2. CCEs shall be undertaken per unit area of insurance per crop, on a sliding scale, as indicated below:

Sl. No.	Level of Insurance Unit of CCEs	Minimum sample size
1	District	24
2	Group of Mandal	16
3	Mandal	10
4	Village / Village Panchayat	4 for major crops and 8 for other crops

3. In order to maintain the sanctity and credibility of CCEs as an objective method of yield estimation, the modalities mentioned below will be followed:
 - a) State shall strengthen audit process of conduct of CCEs, with necessary checks and balances. Digitizing the CCE process including geo-coding (providing the latitude and longitude of the CCE location), date/ time-stamping and with photographs (of the CCE plot and CCE activity), is a must for all CCEs. (Refer para 7)
 - b) Wherever external agencies are proposed to be used for conducting the CCEs (i.e. CCEs are out-sourced), it should be given only to the registered 'professional' agencies with adequate experience in agriculture field activities/ yield estimation. It is mandatory for these agencies to follow the digital protocol as mentioned in the previous paragraph. Services of such agencies may also be utilized for assessment of Post-harvest loss and losses due to localized risks.
 - c) States shall maintain 'single series' of CCEs, i.e. the same set of CCEs and Yield estimates are used both for Crop Production estimates and Crop Insurance.
 - d) In instances where required number of CCEs could not be conducted due to non-availability of adequate cropped area, the yield estimate for such IUs can be generated by using methods as (i) clubbing with neighboring/ contagious units or (ii) adopting yield estimate of next higher unit, or (iii) adopting the yield of neighboring IU with maximum correlation. Priority of applicability of aforesaid three methods should be notified by the concerned States well in

advance

- e) The yield estimates at IU level shall be submitted by the State Government within the cut-off date, along with results of individual CCEs to the insurance companies.
- f) Insurance company should be given complete access to co-witness the CCEs, as also the digital images of the CCEs and relevant data in the requisite form by the State Government. (as outlined in para XXIV.2.m) A formal letter with the schedule should be given to the IAs sufficiently in advance without fail to help them mobilize the manpower if they so desire.
- g) Wherever the yield estimates reported at IU level are abnormally low or high vis-à-vis the general crop condition, the insurance company in consultation with State Government can make use of various products (e.g. Normalized Difference Vegetation Index, etc.) derived from satellite image data or other technologies to confirm the yield estimates. In case of significant differences between these two yield estimates, the matter should be referred to Technical Advisory Committee (TAC) at Centre and its decision shall be final. For resolving such cases, services of the Mahalobanis National Crop Forecast Centre (MNCFC) may be availed by TAC. MNCFC shall examine the above mentioned both the estimates and indicate their views on the yield estimate at IU for the crop season applying technology and other related parameters.

XI. USE OF INNOVATIVE TECHNOLOGIES TO RATIONALIZE CCES

With availability of a number of satellites with high resolution images orbiting the Earth, there has been a great improvement in satellite imagery products. It has been reasonably proven that satellite imagery can help in demarcating the cropped areas into clusters on the basis of crop health. This feature can be successfully used to target the CCEs within the Insurance Unit (IU). In other words, satellite imagery can help in ‘**smart sampling**’ of CCEs. While an IU with heterogeneous crop health may need standard sample of CCEs, say 4 CCEs per Village / Village Panchayat, the more homogenous IU may need a lesser sample size, say 2 CCEs. This is expected to minimize the total CCEs needed by about 30-40%. States can adopt this technique (of using satellite based remote sensing data for planning of crop cutting experiments) in generating yield estimates while following digital protocol outlined in the preceding paragraphs. For using satellite data for smart sampling, there is need to generate specific crop map. Vegetation Indices need to be computed for the cropped area. On the basis of Vegetation Index, the crop area can be categorized into poor, medium, good and very good crop health strata. Within each stratum, CCE points should be selected randomly. This can be done in consultation with MNCFC and IASRI.

- 5. Similarly Technology will also be used to remove area discrepancy in coverage & direct yield assessment.
- 6. The existing Technical Advisory Committee (TAC) comprising of representatives from Indian Agricultural Statistical Research Institute (IASRI), State Remote Sensing Centres, National Sample Survey Organization (NSSO), Central Statistical Organization (CSO), DAC & FW and insurance company (AIC) may review sample size of CCEs from time to time. TAC shall also review any other technical matters related to conduct of CCEs and timely submission of yield data.

Assessment of Claims (Wide Spread Calamities)

- 7. If ‘Actual Yield’ (AY) per hectare of insured crop for the insurance unit (calculated on basis of requisite number of CCEs) in insured season, falls short of specified ‘Threshold Yield’ (TY), all insured farmers growing that crop in the defined area are deemed to have suffered shortfall in yield of similar magnitude. PMFBY seeks to provide coverage against such contingency.

‘Claim’ shall be calculated as per the following formula:

$$\frac{(\text{Threshold Yield} - \text{Actual Yield})}{\text{Yield}} \times \text{Sum Insured Threshold}$$

Where, threshold yield for a crop in a notified insurance unit is the average yield of past seven years (excluding a maximum of two calamity year(s) as notified by State Government) multiplied by applicable indemnity level for that crop.

8. Illustration:

In table below, assumed yield of wheat for the last 7 years is given for insurance unit area of “X”. Calculation of TY for Rabi 2014-15 season is as under:

Year	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15
Yield (kg/ha)	4500	3750	2000	4250	1800	4300	1750

The years of 2010-11, 2012-13 and 2014-15 were declared natural calamity years.

Total of yields of seven years is 22350 kg/ha and that of two worst calamity years is 3550 kg/ha i.e. (1800+1750). Therefore according to the provision, average of past seven years excluding maximum two calamity years will be

$(22350 - 3550 = 18800 / 5)$ i.e., 3760 kg/ha. Hence, threshold yield at 90%, 80% and 70% of indemnity levels will be 3384 kg/ha, 3008 kg/ha and 2632 kg/ha respectively.

However, in instances where requisite number of CCEs could not be conducted due to non-availability of adequate cropped area, the yield estimate for such insurance units can be generated by
1. Clubbing with neighbouring / contiguous unit or
2. Adopting yield estimate of next higher unit or
3. Adopting the yield of neighboring insurance unit with maximum correlation. The priority of these methods would be in the order of 1, 2 & 3.

XII. ON ACCOUNT PAYMENT OF CLAIMS DUE TO MID-SEASON ADVERSITY

1. It is proposed to provide immediate relief to insured farmers in case of adverse seasonal conditions during the crop season viz. floods, prolonged dry spells, severe drought etc., wherein expected yield during the season is likely to be less than 50% of Threshold yield.

a) Eligibility Criteria:

- i. All notified Insurance Units would be eligible for “ON ACCOUNT” payment only if the expected Yield of the affected crop during the season is less than 50% of threshold yield.
- ii. The provision is invoked by the State Government through damage notification based on the proxy Indicators.
- iii. The provision could be invoked for a specific crop or group of crops in Notified Insurance Unit, depending on fulfillment of laid down conditions.
- iv. Insurance company may decide the quantum of likely losses and the amount of ‘on-account’ payment based on the joint survey of Insurance Company and state government officials.
- v. Only those farmers would be eligible for financial support under this cover who has paid the premium / the premium has been debited from their account before the damage notification by the state government invoking this provision for compensation.
- vi. Maximum amount payable would be 25% of the likely claims, subject to adjustment against final claims.
- vii. If adversity occurs within 15 days before the normal harvest time, this provision will not be invoked.

- b) **Proxy-Indicators:** Indicators to be used for loss intimation could be rainfall data, other weather data, satellite imagery and crop condition reports by district level state government officials, supported by media reports. The State’s notification should also spell out all the necessary details in this regard.

c) Loss assessment procedure:

- i. Joint committee of State Government and the insurer for assessment of crop damage, has to be formed and notified before start of the crop season by the SLCCCI for each district.
- ii. This Joint Committee shall decide the eligibility for on-account payment based on the weather data (available AWS notified by the Government) /long term average rainfall data/satellite imagery supported by estimated yield losses at notified Insurance unit level. Loss intimation order has to be issued within 7 days from the adverse seasonal event.
- iii. Based on the above report, a joint inspection of the affected area may be done by Insurance Company for ground truthing with State government officials and arrive at the extent of loss.
- iv. Information/ Services of Mahalanobis National Crop Forecast Centre (MNCFC) may also be utilized for determination of extent of loss for on-Account payout.
- v. If the expected loss of the affected crop is more than 50% of the normal yield for the Notified Insurance Unit, on-account payment would be payable.
- vi. On-account payment would be calculated as per following formula:

(Threshold Yield - Estimated Yield)

$$\frac{\text{Yield}}{\text{Yield}} \times \text{Sum Insured} \times 25\% \text{ Threshold}$$

- d) **Time frame for loss assessment and submission of report:**
- i) An order will be issued by State Government defining eligibility of on-account payment with details of damaged Insurance Units within 7 days from the occurrence of adverse seasonal event.
- ii) Loss assessment report at the affected insurance unit level has to be completed by the joint committee within 15 days from occurrence of the adverse seasonal event.
- e) **Conditions:**
- i. Mere disbursement/ sanction of loan without receipt / debit of premium before the notification of calamity would not make a farmer eligible for the claim.
- ii. The On-account payment would be disbursed by the insurance company only after the receipt of Government share of premium subsidy.
- iii. On- account payment would be paid to all eligible insured farmers within one month of the notification invoking this provision by the State Government and subject to receipt of loss report from State Government.
- iv. These claims would be adjusted from the end season area approach yield based claims.

2. Illustration

District ‘A’ has been affected by floods having 100 insurance units under Crop ‘X’. Out of which 50 insurance units were severely affected and as per the weather indicators / agro-met data, it has been assessed that 30 insurance units could have yield loss of more than 50% (compared to the threshold yield). Out of these 30 insurance units, estimated yield loss for 5 units is 80% (Category-I), for another 10 units, it is 70% (Category-II) and remaining 15 units, it is 60% (Category-III) of normal average yield. As per declarations received, if sum insured for notified areas in Category-I, Category-II and Category-III is Rs. 1 crore, Rs. 2 crore, and Rs 3 crore, respectively, then likely total claims will be Rs. 80 lakh, 140 lakh and 180 lakh, respectively. Hence on-account claims upto 25% shall be Rs. 20 lakh, 35 lakh and 45 lakh, which will be released during the season subject to receipt of premium subsidy.

XIII. PREVENTED / FAILED SOWING AND PREVENTED PLANTING / GERMINATION CLAIMS

- 1. It is proposed to provide insurance cover to farmers in case of widespread incidence of eligible risks (para IV.1.a) affecting crops in more than 75% of area sown in a notified unit at early stage leading to total loss of crop or the farmers are not in a position to either sow or transplant the crop.

The precondition for this cover is issuance of notification of the scheme before commencement of normal sowing process and details of insurance coverage from banks should have been advised to Insurance Company.
- a) **Eligibility Criteria:**
- i. The State Government would provide Notified Insurance Unit and crop wise normal area sown at the beginning of the season within 15 days.
- ii. Notified Insurance Units will be eligible for “Prevented Sowing / Planting” pay-out only if more than 75% of Crop Sown Area for notified crop remained unsown due to occurrence of any of the above perils.
- iii. The provision is invoked by the State Government through notification based on the proxy Indicators.
- iv. Only those farmers would be eligible for financial support under this cover who have paid the premium / the premium has been debited from their account before the notification by the state government invoking this provision for compensation.
- v. The State Government would notify crop wise and agro-climatic zone or district wise cut off dates by which, this provision could be invoked.
- b) **Proxy-Indicators:** Indicators like rainfall data, other weather data, satellite imagery and crop

condition reports by district level State Government official, media reports and area sown data released by State Government

c) **Loss assessment procedure:**

- i. State Government would declare a Notified Insurance Unit as having suffered Prevented or Failed Sowing / Planting conditions with approximate areas in percentage of the unit.
- ii. The Lump sum payout under this cover would be limited to 25% of the sum insured and the insurance cover will be terminated.

d) **Conditions:**

XVI.a. Acreage discrepancy

Some areas in the past have reported excess insurance coverage vis-à-vis planted acreage, leading to over-insurance. Ideally the discrepancy should be handled at farm level to protect the interest of farmers with genuine insurance coverage. All suitable measures should be taken by concerned stakeholders for de duplication with the help of land records, banks records, revenue records and proposal/loan application of insured farmers. However, in the absence of digitized farm records on a GIS platform, it would be cumbersome to physically verify each farm when the reported discrepancies are comparatively large compared to the sown areas. For the time-being, it is to be addressed as follows:

- a) Wherever the 'acreage discrepancy' is likely, the acreage insured at IU level **shall be compared with average planted acreage of past three years, and the difference is treated as 'excess' insurance coverage after taking into account sown area data of the Revenue authority.**
- b) Sum insured is scaled down in the proportionate ratio the average of three years' actual planted acreage bears to the insured acreage for the given crop.
- c) Claims shall be calculated on the scaled down sum insured
- d) Premium (farmer share and Central and State Government Subsidy) shall be refunded back to Government of India for the portion of sum insured scaled down and the amount may be utilised for improvement of technology/ research/ Impact assessment etc.

Once the individual farms (plots / survey numbers) are digitized and available on a GIS platform, it is quite possible to overlay the crop cover as derived using satellite imagery on the GIS platform to identify the as derived using satellite imagery on the GIS platform to identify the crop and estimated the cropped area on each farm. This should lead to identifying the acreage discrepancy at individual farm level.
